

Education

University of Bergen , Doctor of Philosophy Institute of Global Public Health, Faculty of medicine: Currently developing an integrated, sensor-based IoT ecosystem to support independent living for elderly populations. This project involves the design of a rule-based AI architecture and the engineering of automated pipelines for data integration, processing, and harmonization.	Mar 2025 Bergen, Norway
South Asian University 🌐, MSc in Computer Science (24 Months) Research thesis titled - "Leveraging rule based techniques for optimized generation of schedules". Advisor - Prof. Pranab K. Muhuri Curriculum encompassed in-depth studies on Data Mining, Machine Learning, and Fuzzy Sets.	Aug 2021 – 2023 New Delhi, India
Advance Diploma in Computer Application , Diploma in Advance Application of Programming Languages (12 Months)	2020 – 2021
Integral University 🌐, BSc.(Hons.) in Computer science (36 Months) Major in Computer Science. Minor in Mathematics and Physics. Written a journal on Artificial intelligence and AI in machines and devices.	2016 – 2019 Lucknow, India
Kendriya Vidyalaya , Intermediate Completed my school education.	2016 Lucknow, India

Teaching, Research and Dissemination Activities

South Asian University , PG Researcher and Lab TA at Computational research lab Working with Prof. Pranab K. Muhuri and other senior members of Computational intelligence lab, assisted him in writing review work of publications on Industry 4.0, and working on Explainable AI.	May 2022 – 2024 New Delhi
Ad-hoc Lecturer , Urmila ITI college As, Ad-hoc lecturer i was responsible for teaching computer to diploma students and Preparation of Teaching and subject materials to the students.	Aug 2023 – Jan 2024
Pandey S. (2024), Industry5.0. An Idea of Smart Industrial Revolution Pandey, S. (2024). Industry5.0. An Idea of Smart Industrial Revolution. In A study on Industrial revolutions , Ai and it's impact on Healthcare Industry. (Version 1, pp. 04–11). License C.C 4.0. https://doi.org/10.5281/zenodo.12786395	Jul 2024
NORA TECH : Research school , Causality and Machine Learning Attended the NORA – Norwegian Artificial Intelligence Research Consortium research school. I have worked on different Causal ML models and their applications for predictive modelling. Did a project titled "Effect of Use of Social Media and Generative AI on Aptitude of the Users" on generated synthetic data.	Jun 2026
Approval of Regional committees for medical and health research ethics of ALIVE: The digital lifestyle intervention platform for home-dwelling older adults with complex conditions. A pilot study for feasibility testing , CC.AGE Pilot Study, Case number: 963510 Actively drafted and successfully obtained the REK (Regional committees for medical and health research ethics) approval for the user trail of our ALIVE app ecosystem in Bergen municipality and nursing homes	Apr 2026 Bergen, Vestland, Norway
Ellis Summer School Machester, UK , Machine learning for healthcare and Biology Accepted for a funded opportunity to participate in Summer School by the ELLIS Society. Worked on an ML-based framework for Patient data analysis.	Jun 2025
Is technology replacing human care? , Opinion Article: Science Norway Wrote an opinion article for science Sciencenorway 🌐 , where i have talked about recent advancements of in Med-Tech and it's effect on healthcare and whether it can replace human care.	

Professional Experience and Internships

Vallabhi IT Services , Ai Engineer As an Ai engineer I working upon a Deep leraning model of Conversational Ai which is a upcoming flagship product of Company. Apart from this the role involves, Managing the team for the projects. Planning the product and pitching the customers and marketing. Heading the Data analytics and Ai/ML service division.	Jul 2024 – Feb 2025
Amazon , AWS Data Engineer Trainee SPS - QC (US) - Amazon As a data engineer trainee at amazon, i was responsible for the query management and was involved with quality control managment team in their automated processing operations.	Mar 2024 – Jul 2024
Cognizant Technology Solutions , Programmer Analyst As a Data analyst, responsible to identify and analyze data quality errors using SQL, and resolve as per requirement. Write SQL Scripts for automation process as per business requirement.	2021 – 2022
GT-Xblaze (startup) , Co-Founder and CTO Started our own cycle D2C startup. I was responsible for company's web deployment, consumer service setup, social presence and marketing campaigns. Pointing out the target audience with gathered data.	2020 – 2021

Academic and Open Source Projects

Predictive and Statistical Analysis using ML and Data fusion on R for Enhanced life expectancy. Synthesized five disparate datasets from international sources to conduct a 50-year longitudinal study; applied multiple regression and predictive analytics to determine key statistical drivers of health data.	
---	--

ML model investigating population dynamics of a species, Studying various factors affecting the species using computational Models
this projects investigates how factors such as food availability, predation, and environmental changes influence population growth and stability. A synthetic data has been utilised to work on the study.

Built a Multi Disease prediction Model

The disease Include Blood - sugar , Heart-disease and Parkinson.

Brain tumor Prediction Model

the model is trained on MRI dataset using TensorFlow and Pytorch Frameworks.

Project on Big data analytics, health data analytics and Multi disease & Brain tumor prediction Models

Additional Experience and Honors

UNICEF Awardee

Was recognized and awarded by UNICEF for the Help ,Awareness and fact check campaign during Covid through a social media handles named "Covid Helpline"
